

NCR TouchPort 80

Looking to extend the self-service experience to the outdoors?

YES

The future of breakthrough outdoor technology is here

The NCR TouchPort 80 is the natural choice for any operation looking to take self-service outdoors for greater customer flexibility, improved profitability and transaction expediency. Engineered to embody the same streamlined modularity, powerful architecture and “all-in-one” versatility inherent to traditional NCR kiosks, the NCR TouchPort 80 is also built with reinforced durability to withstand Mother Nature’s harsh elements.

- **Establish more self-service touchpoints**

By expanding your self-service deployment with more designated touchpoints, you’re building more opportunities for customer flexibility and convenience—while also taking proactive measures to meet your customers’ growing demands.

- **Increase throughput**

The superior speed and performance of the NCR TouchPort 80’s built-in Intel® Core™ 2 Duo processor significantly reduces average transaction times and contributes to a more convenient and faster experience.

- **Support for various media**

The NCR TouchPort 80 seamlessly integrates a camera-based barcode imager to read a broad range of 1D and 2D barcode symbologies on driver’s licenses, mobile phones, PDAs and printed documents to provide your customers with premier document-reading capabilities for yet another time-saving measure.

- **Safeguard against Mother Nature**

The advanced ruggedization and NEMA 3R rating make the NCR TouchPort 80 ideally suited for any covered outdoor location. Designed with water-tight gasketing and an integrated thermoelectric (TE) device that both heats and cools, the NCR TouchPort 80 offers protection against rain, sleet and snow for maximum dependability.

- **Do your part for the environment**

Because TE energy relies on electricity to trigger the thermal exchange, no dangerous chlorofluorocarbons (CFCs) are released, reducing the impact on the environment.

- NEMA 3R-rated enclosure
- Ambient operating temp with TE cooler: -20°F-120°F (-28°C-49°C)

MOTHERBOARD

- Intel Core 2 Duo processor
- 1GB RAM
- 80GB hard drive

DISPLAY

- 17" transfective LCD, 500cd/m², 1280 x 1024 resolution

TOUCHSCREEN

- A chemically hardened, glass surface resistive 6mm-thick glass panel

PRINTING CAPABILITIES AND INTEGRATED READERS

- "Swipe" style magnetic stripe card reader (MSR)
- Camera-based barcode imager (reads 1D and 2D barcodes)
- 8" wide-format thermal printer (smaller widths also supported)

OPERATING SYSTEM

- Microsoft® XP Professional

OPERATING VOLTAGE RANGE

- 120 VAC, 480 watts
- 4.5 A = 4.5 Amps
- 60Hz = Hertz, cycles per second

LOCKS

- Swing handle latch with key

COLORS

- Standard gray
- Customer-specified colors

DIMENSIONS

- | | | |
|----------|-------|-----------|
| • WIDTH | 22" | 55.88 cm |
| • LENGTH | 25.5" | 64.77 cm |
| • HEIGHT | 56" | 142.24 cm |

CONNECTIVITY

- External ADA-compliant audio jack (front-facing)
- Wired LAN connector
- Support for USB wireless LAN adapter (adapter not included)
- VGA pre-wired only

OPTIONAL FEATURES

- Additional RAM (up to 4GB)
- Swipe passport reader with ATB reader
- Wireless cell modem bracket
- Pedestal or no pedestal (customer-specified colors available)

Experience a new world of interaction
